

# HUMANI-TREE

**Our humanity is tall like a tree,**

**Mutations, called “diversity,” stretch like  
branches reaching for the sky,**

**Our genetic profile is more diverse than the  
rainbow’s invisible spectrum of light.**

**Roots of ancestors are like an iceberg,  
revealing only glimpses of the mass support  
of the ages.**

**The key to change begins with today:  
Turning thoughts  
weeding  
making space for something new.**
